## Release of the “Boosting Malaysia’s National Intellectual Property System for Innovation” Publication

The report “**Boosting Malaysia’s National Intellectual Property System for Innovation**” is now released.

This review assesses how Malaysia's national intellectual (IP) system supports innovation and **offers recommendations** to improve its design, looking in particular to enhancing opportunities for **small businesses, traditional sectors, exporting industries and research institutions to use IP more effectively in their innovation activities.**

A **short presentation** of the report main findings is available on the [publication’s webpage](#).

### Getting a copy

If you are interested in a copy of the report, please email us at [inno4dev@oecd.org](mailto:inno4dev@oecd.org).

## Innovation Policy Toolkit

As part of the development of an **innovation policy toolkit** on the [innovation policy platform](#), the project is undertaking a policy collection exercise **scoping out existing innovation policies supporting inclusiveness.**

In this view, the project is collecting **examples of innovation policies** that have as **explicit aim to contribute to territorial, industrial and social inclusiveness.**

**We welcome contributions** in the form of case studies and names of relevant policies. Contact us at [cynthia.lavison@oecd.org](mailto:cynthia.lavison@oecd.org) or [caroline.paunov@oecd.org](mailto:caroline.paunov@oecd.org)

*We are looking for examples of national innovation policy programmes that...*

- A. Explicitly target lagging and less innovative regions.*
- B. Explicitly aim to include in innovation activities individuals and groups that are not usually participating in those activities.*
- C. Explicitly aim to foster innovation activities in non-innovative sectors and non-innovative Small and Medium-sized Enterprises (SMEs).*

## National Intellectual Property System Review of Kazakhstan

From 24-28 August, the project conducted a **fact finding mission in Kazakhstan** for the upcoming **National Intellectual Property System Review** of Kazakhstan. The mission allowed liaising with local stakeholders on IP matters in Kazakhstan to learn about needs and priorities of different actors regarding IP in support of innovation.

## Ongoing Work of the Innovation for Inclusive Growth Project

The project is currently developing a **framework outlining possible linkages between knowledge-based capital and how innovation affects income inequality.** Statistical analysis using country, industry and firm data is used to understand these linkages better so as to identify policy implications. Work on territorial inclusiveness and a background study on inclusiveness in education are also underway. Initial results will be available by the end of the year.
